From April 1 to 19, the annual forum dedicated to the art of planning and implementation of transportation was held at the Faculty of Marketing and Logistics. In this article we share the results of the «logistician's holiday».

Recall that the Logistics Forum is a real masthead for anyone who wants to master the art of logistics management. Here you can get new knowledge and pump up practical skills. For this purpose within the forum are held:

The Olympiad is divided into three activities:

At the first stage participants are divided into teams and solve a case from one of our partners: Neoterra Logistics or Nettox Logistics.

Afterwards, they earn points for their team at the individual testing stage.
